AN AFFILIATE PROPOSAL · FOR TRUST & WILL

Warm leads. *Already paid.* Already diagnosed.

EstateReady is the $21 assessment that runs before the will. Every reader of our report has named a planning gap, paid to understand it, and received specific recommendations tied to their situation.

For an execution platform, this is the cleanest top-of-funnel we know how to build.

$21	40	7	4	100%
one-time, no subscription	questions	planning domains	tier scoring system	paid before report opens

§ 01 THE PRODUCT

Forty plain-English questions. One scored report. No subscription.

A user lands, pays $21, completes a guided intake across seven planning domains, and receives a tiered report with AI-written findings and ranked priority actions — delivered via a secure link, valid one year.

INTAKE	SCORING
40 questions · ~10 minutes 7 planning domains	**4 tiers · gap-weighted** Foundational → Advanced
REPORT	**STACK**
AI narrative · priority actions Delivered by email link	**Next.js · Supabase · Stripe** Claude API for narrative

§ 02 THE REPORT — WHAT THEY WALK AWAY WITH

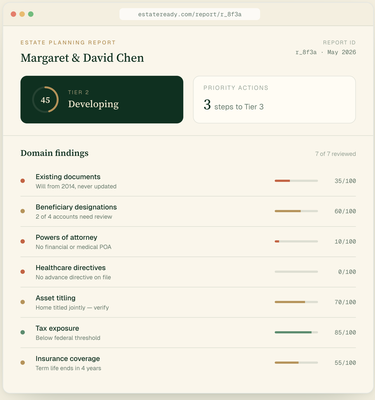

Fig. 02 Composite report · Tier 2, "Developing" · seven-domain breakdown with priority actions.

Each report ends in a list of *specific* next steps.

Findings are scored, ranked, and written against the user's actual answers — not a generic template. Where the gap is "no will" or "stale beneficiaries" or "no advance directive," the next step is something a partner platform can do.

DOMAIN 04 · HEALTHCARE DIRECTIVES — CRITICAL GAP

You don't have an advance directive on file.

Without a written directive, decisions about end-of-life care default to your next of kin under state law — even if your wishes are well known. This is the single most common gap we see in Tier 1 and Tier 2 reports.

RECOMMENDED NEXT STEP

→ Execute an advance directive in your state of residence.

§ 03 THE AUDIENCE

People who already know they should have done this.

Tire-kickers don't pay $21 to find out their estate plan is incomplete. The user who finishes the EstateReady assessment is, by definition, in motion.

NOTE ON VOLUME

Newly launched. Profile percentages are early-traffic estimates and will be reported with hard data once we scale distribution.

01 · SANDWICH GENERATION	02 · YOUNG FAMILIES	03 · PRE-RETIREES
Adult children, aging parents	**Homeowners with kids under 10**	**Simplifying before retirement**
~38%	~34%	~22%
of early traffic profile	of early traffic profile	of early traffic profile

§ 04 THE SHAPE OF THE HAND-OFF

A reader who has already paid to be told they have a gap is the easiest reader you'll meet today.

01	02	03	04
Acknowledges	**Pays**	**Diagnoses**	**Acts**
User opens the assessment because they know something is missing.	$21 — small but non-zero. Cleanest proxy for intent we know.	Receives specific, situation-tied findings. Reads them.	Clicks the next step. For most readers, that is document execution.

§ 05 WHAT WE PROPOSE

A clean affiliate relationship, placed where it's most useful.

Two placements, both inside the moment the user is most receptive to the next step. Compensation tied to converted users, attribution tracked on both sides.

WHY NOW

We are pre-volume. Reaching out before we scale gives both sides time to build the right surface — UTM structure, attribution windows, on-site placement — rather than retrofit one under load.

PLACEMENT A — **In-report recommendation**

Surfaced inside the user's report alongside their domain findings, only for assessments indicating document-execution gaps.

PLACEMENT B — **Post-report delivery email**

A second touch in the email that delivers the report link — for the cohort that does not convert in-product on first read.

COMPENSATION — **Referral commission per conversion**

Per-conversion bounty through our affiliate link. Specific rate and attribution window subject to your standard partner terms.

REPORTING — **UTM + partner-side dashboard**

We pass user-scoped UTM context (anonymized); we read your conversion dashboard. Monthly reconciliation.
